News from the projects

TYP03 v4

- Development of v 4.3 started yesterday
- Release manager is: Oliver Hader
- Oliver will reveal the planned features on Friday afternoon
- Sponsoring opportunities

News from the projects

TYP03 v5

- Karsten moved from Braunschweig to Lübeck
- Shared office since yesterday
- After this keynote: Brainstorming session about specification / contributions to v5
- DEV3 – presented on Friday afternoon
- Andreas Förthner started designing the Security Framework
- Robert started with first technical concepts for backend

Topic of the week: The last 10 meters

The last 10 meters

- ❖ TYP03 v5 team still consists of a handful of people
- ❖ We'd love to widen this group and invite more developers
- ❖ However there's one problem: Finishing things 100%
- ❖ We need a lot of important components for v5
- ❖ And many new features for v4 require reliable developers
- ❖ It's essential that these are developed cleanly in a reasonable time

The usual situation

- ☛ week 1: enthusiasm
- ☛ week 2: duty
- ☛ week 3: resignation, but not realizing it
- ☛ week 4: giving up, without telling anyone
- ☛ week 40: someone else picks up the task

Motivation

- ❖ Feeling of completeness: Nice piece of work
- ❖ How to eat an elephant?

Motivation

- ❖ Feeling of completeness: Nice piece of work
- ❖ How to eat an elephant?
 - > In small pieces
- ❖ Small package instead of all-or-nothing
- ❖ Big jumps vs. small jumps

Communication

- ☛ Make your work visible
 - Use a public repository
 - Publish news from the bleeding edge
 - Continuous Integration: Commit early
 - ☛ Overview, others know the current status
 - ☛ Use working branches if necessary
 - Keep your code clean and readable

Communication

- Set up guidelines for contributions
- Accept help

Have a look beyond your own nose

 v5 core devs:

- Look at how the v4 team manages contributions and commits
- Checkout what you can learn from the review principles and release procedures

 v4 core devs:

- Learn from the v5's approach to test-driven development and automated tests
- See how tools and procedures can help you with Continuous Integration

Be the code with you.

Have FUN!
