**share**

# TYP03 4.3 Development

- ☛ personal demands
  - required for own projects
  - progressive development
- ☛ feature requests by companies
  - possibility to sponsor projects
  - roadmap with specified end
  - developers are available/visible

Inspiring people to  
**share**

# TYP03 4.3 Development

- ☛ all time focus
  - performance
  - usability
- ☛ unfinished/unstable projects are postponed

Inspiring people to  
**share**

# Possibilities of contribution

- ☛ Ideas & Feature Requests
- ☛ Testing & General Feedback
- ☛ Work
  - sponsored projects
  - bachelor/diploma/master thesis – TYP03 Core Mentoring
- ☛ Money
  - donate / sponsor projects

Inspiring people to  
**share**

# Ideas: General

- ☛ Installer
- ☛ UTF8 by default
- ☛ RSA authentication library
- ☛ Code Cleanup (templating, extract static JavaScript from PHP)
- ☛ Error and Exception handling
- ☛ Integrate OpenID as SSO service

Inspiring people to  
**share**

# Ideas: Frontend

- ☛ Improve caching mechanism
  - per object/plugin caching
  - redundancy checks and content references
  - static file caching
- ☛ Integrate API for minified & merged CSS/JavaScript data
- ☛ Support for clustered systems/multiple hosts

Inspiring people to  
**share**

# Ideas: Frontend

- ☛ Indexed Search with MySQL fulltext indexing
- ☛ Improve link generation of menus (tslib\_menu vs. typolink)
- ☛ Introduce frontend rules
  - user defined conditions via GUI
  - integrate existing mechanism (e.g. usergroups)
- ☛ Improve frontend editing
- ☛ Improve tslib\_pibase for extensions

Inspiring people to  
**share**

# Ideas: Import/Database

- ☛ Improve/Refactor the impexp extension
- ☛ Integrate MySQLi extension
- ☛ Try to integrate Transactions
  - where it makes sense
  - e.g. for workspaces

Inspiring people to  
**share**

# Ideas: Backend

- ☛ New Form Wizard
- ☛ Improve TypoScript Editor – „t3editor“
- ☛ Improvements to the page module
- ☛ Improvements to the list module
- ☛ Conditions for Page TSconfig & User TSconfig
- ☛ Improve record recycling concept

Inspiring people to  
**share**

# Ideas: Backend

- ☛ User & Group management by regular backend users
- ☛ Integrate date selector (e.g. date2cal)
- ☛ Dialog API for notification and interaction
